

2016 Work Day

December 5 was a perfect day, full of sun and seasonably warm temperatures; the volunteers could not ask for better weather. On that day, 35 tree care companies, 130 volunteers and roughly \$9 million worth of equipment joined forces at Branch Brook Park in Essex County to complete over \$95,000 in tree work. The extent of work throughout the park included pruning, removals and stump grinding with fertilization in Cherry Blossom Center. NJA ISA past-president, Paul Cowie helps to manage Branch Brook Park's flowering cherry trees and is always a huge help in coordinating Essex County Parks and the NJA ISA whenever an event brings the park and chapter together. The camaraderie, weather and lunch, which came from an Italian place in Montclair, made for another successful, injury free Work Day. Thank you to all of the companies and volunteers who joined us!
